

## Accelerate your digital innovation journey using Self-Service Development Platform-as-a-Service (PaaS)

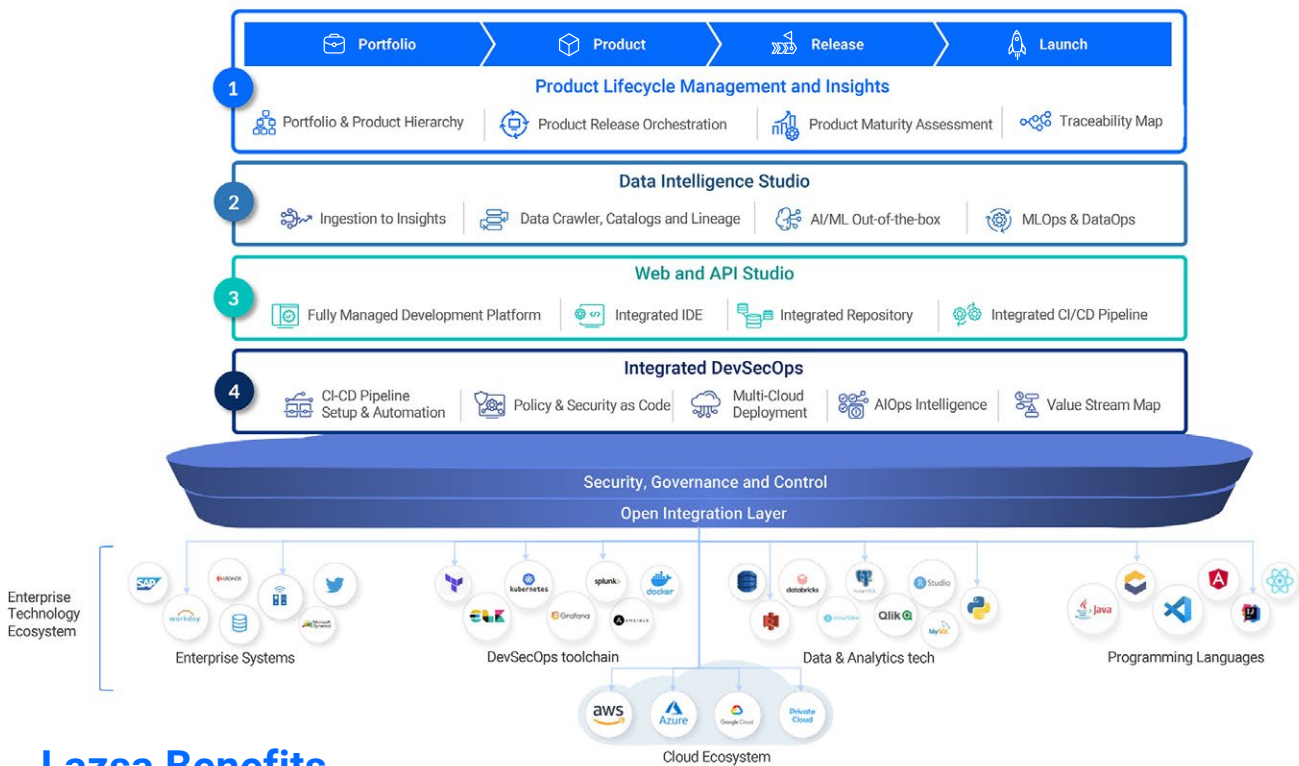

Deliver digital and data products with a competitive edge and superlative customer experience on the robust, collaborative, innovation-led Lazsa platform!

Technology executives today are in a constant pursuit of leveraging technology to create competitive advantage and drive business priorities. While the technology landscape is changing by the day, choosing a future-proof digital platform without disrupting the existing ecosystem and resource skill set is the biggest barrier to a successful digital journey.

### Challenges faced by Technology Executives?

<p>Slow-paced software delivery leading to delayed time to market</p>	<p>Cloud first strategy and modernization of technology ecosystem involves steep learning curve</p>
<p>Complex processes and dynamic technology ecosystem posing challenges in lean software delivery process</p>	<p>Building 'Data and AI organization' as competitive strategy is highly complex and resource-intensive</p>
<p>Absence of product oriented approach, unified process and governance creates challenge in scalability</p>	<p>Devising IT-leveraged business strategies is cumbersome and not scalable</p>

Lazsa Integrated Product Platform-as-a-Service (pPaaS) is an open and fully-integrated digital platform to ideate, design, build, and deliver cutting-edge digital solutions and products, from ideation through productization. It unites the enterprise by bringing business and technology teams together to deliver business solutions faster, providing competitive edge.

### Lazsa Benefits

<p>Improved productivity resulting in faster time to market for your digital and data products</p>	<p>One platform to drive 'ideation to productization' using best-in-breed technologies and processes</p>
<p>Simplification, standardization, and adoption of lean software delivery management with enhanced developer experience</p>	<p>Future-proof technology landscape without disruption</p>
<p>Faster time to value for data and AI initiatives through comprehensive Data Intelligence Studio</p>	<p>Single platform to manage and monitor application health and security</p>
