Innovation Sandbox

Calibo offers unparalleled digital innovation acceleration. Rapidly prototype and test concepts with our managed service, Accelerate One. With your very own pre-integrated tenant, delivered in just two weeks.

Prototype, test, and launch enterprise-ready solutions in weeks - not months.

- **Fast-track your digital and data innovation.**
- **Award winning ecosystem of technologies in one place.**
- **Professional onboarding and persona-based training included.**
- **24/7 support for your complete cloud ecosystem.**
- **No vendor lock-in - simply change your tech stack when needed.**

Your innovation playground. Ready in just a few days.

Start your innovation journey with our recommended tech stack

Cloud Platform	Active Directory	Infrastructure as Code	Agile Planning	Knowledge Management	Code Repository	Data Ingestion	Data Platform	Data Visualisation	Complementary Features
AWS	AD	Terraform	Jira	Confluence	Gitlab	Databricks	Snowflake	Qlik	Calibo

AI/ML	API	Front-End	Continuous Integration	Container	Artifactory	Test Automation	Code Review	Security Assessment	
Python	Java	React	Jenkins	Kubernetes	JFrog	Selenium	SonarQube	Qualys	

Do you want another technology stack combo?

Create your individual configuration from more than 150 available technologies. Get in touch and we'll make it happen.

GET IN TOUCH

"Calibo's sandbox slashed our timelines - our full tech stack was up in under a week, with a realized prototype in just 8 weeks! Absolute game changer!"

Guy Sadeh, Chief Innovation Officer, Insightec

Manage complexity without compromise

Challenges we solve:

- You need to migrate to the cloud but not sure where to begin.
- No in-house expertise to navigate the complex cloud landscape.
- Precious data locked in outdated legacy systems.
- Insufficient interaction between IT and business units.
- Urgent demand from the business for quicker delivery of apps.

Innovation playground to speed-up the digital creation process:

- One single pane of glass for all stakeholders.
- Orchestration and automation of your end-to-end tech stack.
- Self-service provisioning of tooling, environments, infrastructure and more.
- Get new talent started within days, not weeks.
- Adaptive governance through setting guardrails such as policies, templates and more.
- Maximize repeatability and minimize maintenance.

IDP (Internal Developer Portal)

DFS (Data Fabric Studio)

Product Release Orchestration
- Lifecycle observability

Software Engineering
- Guard rails
- Self - management
- Automation
- Reusability

Data Engineering
- Instant data availability
- Data quality and governance
- AI accelerator

Platform Engineering
- Build and configure once
- Adjust when needed

Define > Design > Develop > Deploy

150+ integrations

Your benefits

Pre-integrated tech stack

Access a full development and data engineering environment instantly.

Rapid prototyping sandbox

Experiment with new ideas and validate use cases in weeks, not months.

Self-service innovation

Empower teams to build, test, and iterate without dependencies.

Seamless enterprise integration

Connect with your existing systems and accelerate adoption.

Scalable & secure architecture

Innovate with enterprise-grade security and compliance.

Accelerated time-to-value

Go from concept to production in record time, reducing cost and complexity.
